DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-6 and 19 are drawn to Group A, and classified in Class 114 subclass 162. The subcombination requires a spring-biased rudder assembly that is mounted on a boat stern with a mounting plate.
 - II. Claims 7-18 are drawn to Group B, and classified in Class 114 subclass 39.26. The combination requires a sail boat in the form of a collapsible catamaran, having a rudder mounted on each hull.

2. The inventions are distinct, each from the other because of the following reasons:

The first and the second group of inventions (i.e., Group A and Group B) are related as subcombination and combination.

Inventions in this relationship are distinct if it can be shown that:

- (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and
- (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, i.e., the combination requires a sail boat in the form of a collapsible catamaran with a rudder mounted on each hull, but does not require the rudder to be spring biased, or the rudder to have a mounting plate for mounting to a boat stern.

On the other hand, the subcombination requires a spring-biased rudder assembly that is mounted on a boat stern with a mounting plate. The subcombination has separate utility, such as a use on a non-sail boat, or a boat that is not collapsible.

3. Because these inventions are distinct for the reasons given above and the search required for the first Group is not required for the second Group, a restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ajay Vasudeva whose telephone number is (703) 306-5992. The examiner can normally be reached on Monday-Friday 1:00 pm--5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Joe Morano can be reached on (703) 308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
